

PERSONAL CARE

Many times, a helping hand is all that is required for the elderly or disabled to maintain their independence and stay in their home.

PARTNERSHIP for Health HEALTHCARE provides a variety of Personal Care services, including in-home companionship, food preparation, and transportation for shopping, doctor's appointments, or social activities. These services can allow your loved one to continue to take part in many of the activities that bring joy to their life, and you will have the peace of mind that comes from knowing that you have a trustworthy caregiver.

Personal Care assistance can also strengthen family relationships by lessening the stress family members often feel when faced with the task of taking care of a loved one on a 24-hour basis.

HOME HEALTHCARE

PARTNERSHIP for Health HEALTHCARE has caregivers to assist your loved ones during hospital or nursing home stays. In today's economic environment, hospitals are often understaffed. One of our professionals can provide one-on-one care during the day, overnight, or on a 24-hour schedule. Family members can get much needed rest, knowing that their loved one is receiving individual care and attention.

PARTNERSHIP for Health HEALTHCARE is also provides assistance for those in nursing homes or assisted living facilities. Many times, the services provided in an assisted living facility are not sufficient, especially for companionship. Our caregivers can allow your loved one to retain more independence, even in a nursing home or assisted living setting.

WHY CHOOSE PARTNERSHIP FOR HEALTH HEALTHCARE?

Because the health and safety of your family is too important to leave to chance.

We know that finding someone to care for a loved one is stressful and can even be frightening. It is essential that this person be trustworthy, dependable, caring, and patient.

Utilizing **PARTNERSHIP for Health HEALTHCARE** to find the right caregiver will relieve a great deal of this stress. We carefully screen all of our professional staff. We then go one step further and use personality testing and client assessments to match the right caregiver for each client. This process allows us to guarantee compatibility. If you are not 100% satisfied with every aspect of your caregiver, we will offer a replacement.

PARTNERSHIP for Health HEALTHCARE is locally owned and independently operated. We are not a large corporation where you and your loved one are simply a number. We are a part of your community, and we are your partner in providing care for your family.

Because we provide quality healthcare where you need it.

PARTNERSHIP for Health HEALTHCARE provides enhanced healthcare services for you or your loved one wherever you need it. Whether it is assistance to allow someone to stay in their home, or additional care for those in a hospital, nursing home, or assisted living facility, we can design a package of services that will work for you.

Because when it comes to medical care, you need a firm that is dependable.

PARTNERSHIP for Health HEALTHCARE has guaranteed staffing. Prior to your start date, Partnership for Health will introduce, for your approval, a secondary caregiver as a backup to your primary caregiver. This person will learn the daily routine and be able to step in immediately if your primary caregiver is sick or unable to report to work.

Because we provide quality healthcare that is also affordable.

On average, our in-home service runs less than one-third of the cost of an assisted living facility and less than one-quarter of what a skilled nursing facility would cost. We accept Medicaid, and payments can also be made through credit card/pay pal and private pay.

Because we recognize that we work for you.

At **PARTNERSHIP for Health HEALTHCARE**, our top priority is to create a schedule that works for the family. We will do everything possible to make sure that the schedule you want is the schedule that you receive, and changes are easily accomplished with as little as a day's notice.

Partnership for Health Healthcare employs a variety of healthcare professionals, including: **Registered Nurses, Licensed Practical Nurses, Certified Nursing Assistants, Medical Social Workers, Physical Therapists and Occupational Therapists.**
